

Data Flow Diagram

Import Data Using Transform Maps (Spreadsheet)

Date	02 October 2026
Team ID	SWTID - 2026-5675
Project Name	Import Data Using Transform Maps (Spreadsheet)
Maximum Marks	2 Marks

Data Flow Diagram

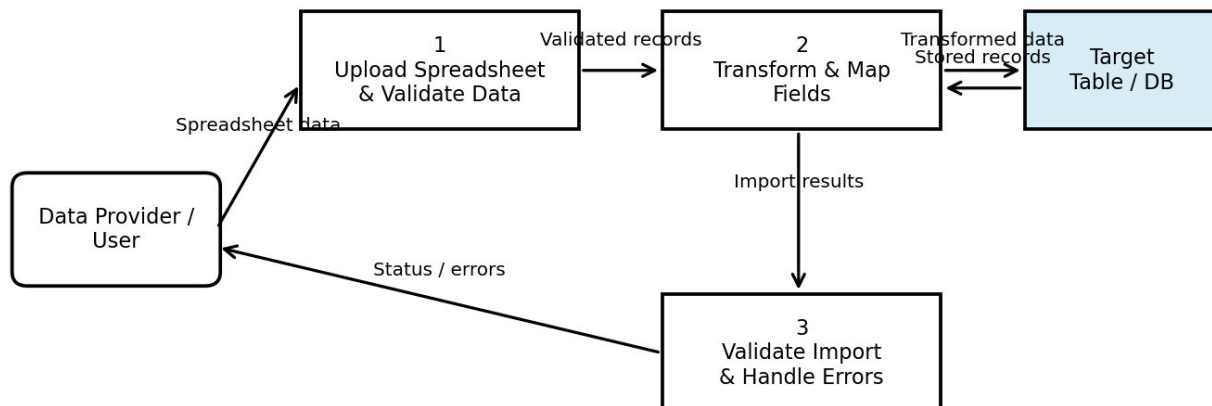

The Data Flow Diagram (DFD) shows how spreadsheet data moves from the user through validation, transformation and field mapping, and finally into the target table/database.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	User or data provider outside the import process.
Rectangle with number	Process	Activity that validates, transforms or imports data.
Solid Rectangle	Data Store	Target table/database where imported records are stored.
Labeled Arrow	Data Flow	Movement of spreadsheet data, records, status or errors.

Data Flow Diagram

Data Flow Diagram - Import Data Using Transform Maps (Spreadsheet)

Flow Explanation:

- The user uploads spreadsheet data to the import process.
- The spreadsheet is validated for required fields and data format.
- Transform Maps match source spreadsheet fields with target fields and transform the data.
- The transformed records are imported into the target table/database.
- Import status and errors are checked so incorrect records can be corrected.
