Date	02 October 2026
Team ID	SWTID-2026-5675
Project Name	Import Data Using Transform Maps (Spreadsheet)

Maximum Marks: 2 Marks

Define Your Technology Stack

The project uses ServiceNow platform features to import spreadsheet data into a target table using Import Sets and Transform Maps. The selected technologies support data loading, field mapping, transformation, validation, and efficient record creation.

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	ServiceNow User Interface (UI)	Provides a simple interface to upload spreadsheet data, configure import options, and monitor import results.
2	Backend / Server-Side	ServiceNow Import Sets & Transform Maps	Handles spreadsheet data import, field mapping, transformation, validation, and loading into the target table.
3	Database / Data Storage	ServiceNow Database / Target Table	Stores the imported and transformed records in a structured table for easy access and management.
4	Cloud / Hosting / Deployment	ServiceNow Cloud Platform	Provides the hosted environment to develop, configure, run, and access the import process without separate server setup.
5	Version Control & CI/CD	ServiceNow Update Sets	Helps capture and move configuration changes between ServiceNow instances for project development and deployment.
6	Third-Party APIs / Other Tools	Spreadsheet (Excel/CSV) & Import Set	Provides the source data in spreadsheet format and enables the data to be loaded into ServiceNow for transformation and mapping.
