

Code-Layout, Readability and Reusability

Date	02 October 2026
Team ID	SWTID-2026-5675
Project Name	Import Data Using Transform Maps (Spreadsheet)
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the project codebase in terms of its structure, readability, and reusability. The Import Data Using Transform Maps project uses a well-organized spreadsheet import process, clear field mapping, reusable transformation logic, and basic validation/error handling.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs are used throughout the code	Yes	Code is formatted consistently.
2	Proper File Structure	Files and folders are logically organized	Yes	Import, transform and project files are organized.
	Meaningful Variable Names	Variables reflect their purpose clearly		Field and data names are meaningful.
4 ³	Function / Method Names	Functions are descriptively named	Yes ^{Yes}	Processing steps use clear names.
5	Code Comments	Inline and block comments explain logic	Yes	Important import and transformation steps are documented.
6	Modular Design	Code is split into reusable functions/modules	Yes	Import and transformation tasks are separated logically.
7	No Redundant Code	Duplicate or unused code is removed	Yes	Unnecessary duplicate processing is avoided.
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Invalid data/import errors are checked and handled.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Spreadsheet Import	ServiceNow Import Set	Used for importing spreadsheet data into staging tables	High
2	Transform Map	ServiceNow	Used to map and transform imported fields to target tables	High
	Field Mapping	ServiceNow Transform Map	Reused for matching source fields with target fields	High
	Data Validation	ServiceNow / JavaScript	Used to validate and clean imported records	Medium
5 ⁴	Import Set Table	ServiceNow	Reusable staging area for spreadsheet data	High

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure		Well-organized import and transformation workflow.
Readability		Clear names, simple steps and understandable configuration.
Reusability		Transform maps and import components can be reused for similar data imports.
Documentation / Comments		Key steps and transformation logic are documented.
Overall Score	5 ⁵⁴	Good overall structure, readability and reusable design.
