

Coding & Solution

Date	02 October 2026
Team ID	SWTID-2026-5675
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of the implemented solution for importing spreadsheet data using ServiceNow Transform Maps. The submission should demonstrate working functionality, clean configuration, and alignment with the defined requirements.

Instructions

1. Ensure the import process is properly configured and follows best practices.
2. Create/import the spreadsheet data and map the source fields to the required target table fields.
3. Configure the Transform Map and field mappings correctly.
4. Include the required screenshots, configuration details, and setup/run instructions.
5. Attach or link the relevant code/configuration repository if applicable.

Solution Summary

Field	Details
Repository Link / URL	[Paste GitHub / GitLab / hosted link if applicable]
Technology / Platform	ServiceNow
Data Source	Spreadsheet
Feature / Configuration	Transform Maps
Key Features Implemented	Import spreadsheet data, create Import Set, configure Transform Map, map source fields to target fields, run and verify imported records
Pending / Incomplete Features	[Enter if any]
Setup / Run Instructions	Upload spreadsheet → Create Import Set → Create Transform Map → Configure field mappings → Run Transform → Verify target records

Code / Configuration Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Import configuration is organized and properly mapped	Yes / No
2	Meaningful source and target field mappings are used	Yes / No
3	Required configuration/documentation is included	Yes / No
4	Error handling / validation is considered for critical import operations	Yes / No
5	The import process runs without critical errors	Yes / No
6	Configuration/screenshots are documented for submission	Yes / No
