

No. of Functional Features Included in the Solution

Date	02 October 2026
Team ID	SWTID-2026-5675
Project Name	Import Data Using Transform Maps (Spreadsheet)
Maximum Marks	5 Marks

Functional Features Overview:

This document lists the functional features included in the solution for importing data from a spreadsheet using ServiceNow Import Sets and Transform Maps. The features cover spreadsheet upload, import set creation, field mapping, transformation, validation, execution, and verification of imported records.

S.No	Feature Name	Feature Description	Module / Component	Status	Marks	Contribution
1	Spreadsheet Data Preparation	Prepare spreadsheet data with required columns and valid values before import.	Spreadsheet / Source Data	Done	1	Provides clean source data.
2	Import Set Creation	Upload the spreadsheet and create an Import Set to stage the source records.	Import Sets	Done	1	Stores imported source data.
3	Transform Map Configuration	Create a Transform Map and select the target table for importing records.	Transform Maps	Done	1	Connects source data to target records.
4	Field Mapping	Map spreadsheet columns to the corresponding fields in the target table.	Transform Map / Field Maps	Done	1	Ensures correct field transfer.
5	Transform Execution & Validation	Run the transform, check the transformation results, and verify imported records.	Transform / Target Table	Done	1	Confirms successful data import.
6	Error Handling	Review rejected or failed records and correct source or mapping issues where required.	Import Set / Transform Logs	Done	0	Improves reliability of the import.
7	Data Verification	Compare imported records with the original spreadsheet to verify accuracy.	Target Table	Done	0	Ensures data consistency.
8	Testing	Test the complete import workflow using sample spreadsheet records.	Import Workflow	Done	0	Confirms end-to-end functionality.

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	5
Additional / Nice-to-Have Features	3
Features Tested & Verified	8

Feature Category Breakdown

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	2	Spreadsheet upload and import configuration screens
2	Backend / Logic	3	Transform Map execution, validation, and error handling
3	Database / Storage	1	Import Set staging and target table records
4	API / Integration	1	Spreadsheet-to-ServiceNow data import workflow
5	Security / Authentication	1	Authorized access to import and transform functions

Solution Workflow

Step	Process
1	Prepare the spreadsheet with the required source columns and records.
2	Upload the spreadsheet and create an Import Set.
3	Create or select the Transform Map and target table.
4	Create field mappings between spreadsheet columns and target fields.
5	Run the Transform Map to move data into the target table.
6	Check logs, validate the imported records, and correct errors if required.
