

PERFORMANCE TESTING

Date	02 October 2026
Team ID	SWTID-2026-5675
Project Name	Import Data Using Transform Maps (Spreadsheet)
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how the Import Data Using Transform Maps system behaves under expected and peak load conditions. The testing focuses on spreadsheet upload, data transformation, validation, and record insertion.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Postman / ServiceNow testing
Type of Testing	Load Testing and Basic Performance Testing
Target Module / API	Import Set and Transform Map – Spreadsheet Data Import
Test Environment	Local / Cloud ServiceNow Instance
Test Date	02 October 2026
Test Data	Spreadsheet with sample records for import and transformation

Step 2: Test Scenarios

S.No	Metric	Target Value	Actual Value*	Status (Pass / Fail)
1	Upload spreadsheet and import a small number of records	5	30	Data uploads and imports successfully
2	Run Transform Map for normal spreadsheet data	10	60	Records are transformed and inserted correctly
3	Process a larger spreadsheet with multiple records	20	120	System remains responsive with acceptable response time
4	Repeated import requests to check stability	30	180	No major errors; stable performance under load

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value*	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	1.4 seconds	Pass	Acceptable average response
2	Response Time (Max)	< 5 seconds	3.1 seconds	Pass	Maximum response within target
3	Throughput (Req/sec)	≥ 10	12 req/sec	Pass	Requests processed consistently
4	Error Rate	< 1%	0.4%	Pass	Low error rate
5	CPU Utilization	< 80%	58%	Pass	CPU usage within limit
6	Memory Utilization	< 80%	61%	Pass	Memory usage within limit

*Actual values shown are sample/illustrative values. Replace them with values captured from the actual performance-testing tool before final submission.

Step 4: Observations & Analysis

Key Findings	The spreadsheet import and Transform Map process completed successfully under normal and increased load. Response time remained within the defined target in the sample test.
Bottlenecks Identified	Large spreadsheet uploads and repeated transformation operations may increase processing time when the number of records grows.
Optimization Steps Taken	Used appropriate Transform Map field mappings, validated spreadsheet data before import, reduced unnecessary processing, and monitored system resource usage.
