

PROJECT DEMO PLANNING

Import Data Using Transform Maps (Spreadsheet)

Date	02 October 2026
Team ID	SWTID-2026-5675
Project Name	Import Data Using Transform Maps (Spreadsheet)
Maximum Marks	1 mark

Project Demo Planning:

This demo demonstrates how spreadsheet data can be imported into ServiceNow using Import Sets and Transform Maps. The team will explain the import process, field mapping, transformation, validation, and the final imported records.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain the need to import spreadsheet data into ServiceNow and introduce the demo objective.	2	Hema Lakshmi
2	Spreadsheet & Import Set	Show the sample spreadsheet and demonstrate how the data is uploaded into an Import Set.	3	Sangeetha
3	Transform Map Configuration	Create/configure the Transform Map and explain source fields, target fields, and field mapping.	4	Monisha
4	Data Transformation & Import	Run the transform process and explain how spreadsheet records are converted and inserted into the target table.	3	Santhiya
5	Validation & Result	Verify the transformed records in the target table and check whether the imported data is correct.	2	Hema Lakshmi
6	Summary & Key Takeaways	Summarize the workflow, benefits, and important points of using Transform Maps for data import.	1	All Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Introduce the team, demo topic, and explain why spreadsheet data needs to be imported into ServiceNow.
2	Solution Overview	Explain the flow: Spreadsheet → Import Set → Transform Map → Target Table.
3	Live Feature Demonstration	Show spreadsheet upload, Transform Map configuration, transformation, and validation of imported records.
4	Q&A Session	Answer questions and briefly recap the important steps and outcome.

Total Planned Demo Duration: 15 Minutes
